Career Objective

Motivated and self-taught frontend developer with a BBA in Management and hands-on experience in building responsive web interfaces using React, JavaScript, and TypeScript. Eager to grow as a developer through a paid internship or junior-level role in a dynamic software team based in Dhaka.

Technical Skills

- Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
- Libraries/Frameworks: React, React Router, Tailwind CSS, Next.js
- Tools: Git, GitHub, VS Code, Chrome DevTools
- Concepts: Component-based architecture, Props & State, Hooks, REST API Integration, Responsive Design

Projects

1. Portfolio Website

React, HTML, CSS, GitHub Pages
- Built a responsive personal portfolio showcasing projects and skills.
- Used Flexbox and media queries for mobile-friendly design.

2. Country App

React, JavaScript, CSS, HTML
- Simple country app show list with search and remove feature.
- Implemented React Hooks for state and side effects.
